How to use ATLA to find articles in *Brethren Life and Thought*

This page explains how to use ATLA Religion Database to find articles in the journal Brethren Life and Thought.

Example: to find updates to Durnbaugh's extensive, 1963 bibliography on the Brethren:

1. In the first search box, type bibliography. (Obviously, if you are hoping to find articles on another topic in BLT, use a different keyword!) Be sure that the box to the right reads "Default Fields."

2. In the "Limit your results" area below, type "brethren life and thought" into the Journal Title box.

To see if ATLA indexes a particular journal, use the green "Publications" button at the top of its search screen.
